### Of Local Interest

Mr Gaskill is having an addition to his house.

Work on Mr Geo. Burt's house is progressing rapidly and Mr Rex Simpson is doing the work.

A large number of friends of Mr and Mrs George Hill, bride and groom of two weeks, gathered at their home south of town, on Wednesday of last week. The guests, both young and old, danced to the stirring music given by Mr Frank Cockrell's orchestra, the square dances being much enjoyed. The wedding cake and other refreshments were served and the guests departed with many good wishes to the hosts.

On Tuesday evening last, the Ladies' Orange Lodge held a whist drive with six tables playing. Mrs E. Webster and Mrs Stirling captured the first prizes while the consolation went to Mrs Philton and David Whiting. The serving of lunch concluded a most enjoyable evening.

A few of our good citizens were seen Tuesday packing on main street, Tuesday morning—there is possibly a reason for this!

A painful accident occurred on Friday night in the roundhouse, where Mr Andy Shurel was struck near the eye with the nozzle of a hose which blew off while he was washing a boiler. Mr Shurel was unconscious and Mr Shurgelow was laid up for a few days.

Mr and Mrs A. N. Junget and family will leave shortly for Shamavon, Sask., where Mr Junget will assume partnership with his father, who owns a butcher shop there. Mr Junget can not be praised highly for the splendid manner in which he has conducted the butcher business, and will be greatly missed.

The St. Monica's W.A. will hold its semi-annual tea on Saturday, Nov. 17th at 3 p.m. There will be a good display of fancy work, novelties, home cooking and candy.

The local Masonic lodge was treated to a sumptuous oyster supper by the Bashaw Lodge last Wednesday evening. Members from Calgary, Edmonton, and Stettler were also present, everyone having a good time.

Mr and Mrs G. B. Eisonor motored to Trochu, Sunday to attend the dedication of the new Ev. Lutheran St. John's church. A very enjoyable time was spent.

The Ladies' Aid will hold a tea and sale of work also home cooking and candy in the library building on Saturday, Nov. 10th, from 3 to 6 p.m. Everybody welcome.

Delburne, October 17—Three watches and \$11 in cash was obtained by thieves when they ransacked the Ray Smith & Co. hardware store here, early Monday evening, entering by way of a window at the back.

Zane Grey's Mysterious Rider with Jack Holt, at the Grand this Saturday.

Want to hear from owner having good Alberta farm for sale. If bargain, send price and description. F. B. G., Box 495, Oney, Illinois.

Having made arrangements with Messrs Cline & Nelson of Ponoka, funeral directions, Mr J. F. Flewelling wishes to announce that he will be able to take charge of funerals and also furnish the necessary supplies.

Mrs W. J. Fray left on Friday for Tisdale, Alberta.

Mr and Mrs Craven have arrived in town and are staying at the home of Mr and Mrs Constable.

Mr Earl Estill is in the General hospital, Calgary, having received injuries to his arm, he expects to be out next week, however, when the family will proceed to the states. Mrs N. J. Estill and Mrs Hoffman went down to the city over the weekend.

Emma Durrant has been on the sick list for some time.

The 50 piece silver set which was presented to Mr and Mrs F. Mann on the occasion of their wedding anniversary was given by their own children and not by the Ripley school children as stated in previous issue.

A surprise masquerade was held at the home of Mr. R. Conway, Monday evening. Many interesting costumes were in evidence. After the masks were removed "500" was indulged in, Mrs Walton and Mrs McNaivir carrying off the prizes. A dainty lunch was served at 11 o'clock. The ladies present were Mesdames Ayls, Cabana, Baugh, Conway McNaivir, Walker, Kerr, Somers, Norton, Russell, Stirling, Thomas, L. Ray, Waters, Saries, Davaoreaux Hyslop, Walton, McLean Cormack and Williams.

### Notice to Threshermen

Owners and operators of threshing machines and combined harvesters are required to send to the Department of Agriculture at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether machine has been used for custom work or only for owner's crop. Special forms for these returns may be secured from the Publicity Branch

Department of Agriculture  
Edmonton

# Youths From Britain Are Returning Home With A New Vision of this Dominion

Starting here a small sign for a tour of Canada as "ambassadors of empire." Fifty representatives of the youth of the British Isles, 25 boys and 25 girls, between the ages of 14 and 21, are returning to their homes in England, Ireland, Scotland and Wales, as real ambassadors for Canada.

Their enthusiasm by the charms and challenges of the Dominion and their desire to help Canada in its future become more declared as a luncheon tendered the party by the city of Montreal.

"We," said Lady Marjorie Dalrymple, in charge of the girls in the party, "have seen the practical splendor of Canada, the warmth of Canada's welcome and hospitality, and the warmth of feeling toward us of the old and young people of Canada, our countrymen and high ambitions. We can sit down our. I believe that if people come out here with open minds and a willingness to work, they will be happy."

Kenneth Lindsay, M.A., Osgoode, in charge of the 25 boys, the party said: "We are going back to set up fifty individual settling agencies for Canada. We are going to help Canada and its Canadian ambitions. We go back with a new vision of Canada."

"We recognize this is a land of milk and honey, but not for those who are not prepared to work," went on Mr. Lindsay. "We are going back to preach the gospel that you want large workers and not idlers."

"We are not concerned about the 'peculiar' penitentiary of the United Kingdom, but we are concerned about a future great and strong love for the empire and we feel this scheme has played a contributory part in that unit of empire which is one of the most potent influences in the preservation of the peace of the world."

"We came to Canada seeking the soul of Canada. We have seen something of the real Canada. We have visited 15 provinces. We have seen the vast wheat fields, even have had a small part in gathering the harvest; we have visited typical city homes; we have seen some gold and other minerals. We have had a good view of your mountains; we have sailed year in and year out; we have seen something of your vast industries and we have seen a great deal of your vast natural resources. And we go back home with a real knowledge of the progress of Canada. We feel that the thing of importance is your future."

Major House suggested Canada adopt a similar scheme, as far as a great number of youths to the British Isles, a return visit to this one. The idea was praised by Mr. Linstead, who promised full co-operation from the other side if the idea was put into practice.

## Chief Of Tobacco Division

Nels T. Nelson, B.S.A., has been appointed chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the Connecticut Valley, Winsted, Connecticut, U.S.A., and previously had several years' experience in tobacco culture. The rapid increase in tobacco production in Canada, which has increased from 10,000,000 pounds in 1921, to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

## Western Cedar Poles

Recent tests at the Department of the Interior's Forest Products Laboratory, Vancouver branch, show that western cedar poles from felled timber have practically the same strength as those obtained from green trees.

Woman may be a somnambulist, but she always has a ready answer.

## Writer Interested In Canadian Home Life

### British Woman Journalist Making Trip Through Dominion

Very few visitors to Canada are impressed with the luxuries of the past, but that is not so, said Miss Diane Cryer, Englishwoman. Unlike most journalists who visit the Dominion it is not the nation's problems—or its wheat crops which interests her most. She is interested in the people and the developing and developing modern homes.

The women of the leisure class in England have no idea of conditions as they exist in Canada, she said, and are not referring to frontier women, but women of leisure. They think this is a terrible country and feel sorry for women who have to live here. They have no idea of the life of the average Canadian. The Canadian Pacific began about ten years ago, when he became special counsel for the company, handling all their important appeals and acting as counsel in various trials.

Canadian plumbing was one thing which caught the attention of the English journalist. Your taps are so big. You have such enormous pipes. The use of hot water comes as nothing to them. Then you seem to indulge yourselves. You keep your home warm, while in England we still depend largely on fireplaces, which are hot in a small portion of the house is hot.

Miss Cryer writes for the London Daily Mail under the pen name of "Nan Gloucester." Following a trip to Canada which partly coincided with one she plans to go to Paris where she is writing a series of articles for the London Daily Mail.

B.C. Poultry Industry

Murdo Smith is establishing a large poultry farm at Port Alberni, on his farm at Terrace, B.C. Last month he added 500 high class laying pullets, purchased from the provincial University henry, to his already big flock.

"Call me at six in the morning." "There will be no need to call you." "How do you know that? What will wake me up?" "Just go to bed and you will see." —Fleigende Blaetter, Munich.

W. N. U. 1751

W. N. TILLEY, K.C.  
Director, Canadian Pacific Railway

W. N. Tilley, K.C., is one of the leaders of the Canadian Bar. He has specialized in railway legal work and has been actively engaged as counsel for all of the larger railroad questions in Canada since 1914. He has been a member of the Canadian Pacific legal staff for ten years, when he became special counsel for the company, handling all their important appeals and acting as counsel in various trials.

Mr. Tilley's wide experience in constitutional railway and corporate

cases has resulted in his being retained both in the Canadian courts and Privy Council in most of the important issues of the past ten years.

Mr. Tilley's first position in the Canadian Pacific was that of hot water engineer, working on fireplaces, then

then you seem to indulge yourselves. You keep your home warm, while in England we still depend largely on fireplaces, which is a hot in a small portion of the house is hot.

Miss Cryer writes for the London Daily Mail under the pen name of "Nan Gloucester." Following a trip to Canada which partly coincided with one she plans to go to Paris where she is writing a series of articles for the London Daily Mail.

## Following Regular Course

Nothing like the Matter With Gulf Stream

Say Old Mariners

Two mariners from across the Atlantic have brought word to New York that contrary to report, the gulf stream is following its regular course.

Some trans-Atlantic shippers had expressed the belief that the warm Atlantic stream was shifting away from the British Isles, but this was disputed by Captain S. G. S. McNeil, of the Cunarder "Queensland," and Captain Johnson, of the Columbus of the New German Lloyd.

"There has been no change in the course of the gulf stream," said Captain McNeil. "It has been running rather stronger this summer and autumn, but it has not shifted." Captain Johnson said the same.

"There have been a number of people here who have been creating a great deal of talk about the gulf stream not running to the coast current. There is nothing wrong with the gulf stream."

Captain Johnson said he has noted no change in the course of the stream.

"It is suggested that for scientific purposes slow moving

ships be sent cross-over the

range of the stream to establish

just what it is doing.

Fast-moving ships are impractical.

"There have been a number of people here who have been creating a great deal of talk about the gulf stream not running to the coast current. There is nothing wrong with the gulf stream."

## Experiment With Flax Straw

Two Tons Threshed Flax Straw From Saskatchewan To Be Sent to Glasgow

Experiments to be conducted with two tons of Saskatchewan threshed flax straw in Glasgow, Scotland, may result in the establishment of new factors in this province.

This is the prospect pictured by H. L. Pritchard, director of the Pritchard Flax Fibre and Pulp Company, Ltd., Glasgow, Scotland, in a letter to the *Star*.

Mr. Pritchard says that two tons of threshed flax straw be shipped to his firm. He wants the straw baled in the smallest possible bulk in transportable lots of two to four hundred pounds each and put on the nearest western Canadian port and shipped to Glasgow.

"We desire to have this waste flax straw after threshing with which to experiment and make flax tow from it. We desire to determine the true economic value of your West, will gain your co-operation in ascertaining what value there is in these short lengths of flax straw which are of no practical use."

In the working of this waste there is no resting or scrutching by our process as the operation of the fibers in these pieces is only mechanical. We would like to know what quantity of flax straw you can be prepared throughout Saskatchewan; what distance the growers would deliver it at the most opportune time after their harvest is finished and what price per ton would induce the flax growers or threshers to ship it to us."

"If the quantity and cost of producing it would be an inducement to the company, we would establish several factories to work the straw into fiber and tow. And then, the fiber only fiber would be required to be transported which would greatly lessen the freight."

The provincial authorities will take steps to procure the necessary information of this straw and the information sought by Mr. Pritchard and do all that is possible to encourage another industry to locate in the province—Regina Leader.

## Question of Dietics

Vitamin Park for Deficiency Disease Discovered in 1911

In 1911 Dr. G. Loveland discovered the vitamin cure for beriberi, a deficiency disease due to removal of the vitamin cover of rice. Soon the vitamin cures for rickets, poliomyelitis, scurvy, pelagra and other deficiency diseases were discovered. Dr. G. Loveland, D.D., the first being fat-soluble "A," and found in fatty foods such as butter, cream, cod liver oil, liver, kidney, egg yolk, ghee, cereals, flaxseed, carrots, sweet potatoes, etc. The water-soluble vitamins are found in succulent vegetables such as cabbage, cauliflower, spinach, lettuce, parsnips, beetroot, potatoes, corn, beans, fruits, nuts, milk and yeast.

## More Wary for Bill

The record of a baptism, 1904, found in a Cottenham, England, church, refers to a John Colbidge, believed to have been an ancestor of President Franklin D. Roosevelt. This may be enough to make Mayor Thomas H. Johnson, of Chicago, go on a rampage in the days before his recent collapse.

"Well, now, what time do I have to get to work mornings?" asked the new hired man.

"Any time you like," responded Farmer Fumblegate. "It's all right, I'm half past four."

Birds have an extra eyelid which can be drawn over the eyeball to protect it from the strong sun while the proper eyelid remains open enabling them to see.

## Not Allseigner Correct

Interviewer: "I have been informed, sir, that you began life as a poor bricklayer."

Great Contrautor: "There are two mistakes in that sentence. I began life as an infant, and there is no such thing as a poor bricklayer."

Husband: "If you hadn't taken so long to get ready we shouldn't have had to wait so long."

Wife: "Yes, and if you hadn't hurried me so we shouldn't have had so long to wait for the next one."

The Guest: "I say, walter, I believe it's bad form to speak disrespectfully of one's elders."

The Waiter: "So I 'ave 'eard, sir."

The Guest: "Then I will be silent about this chicken."

The custom of referring to important people as "nobs" had its origin in the "nobs," abbreviated Latin for "son of a nobleman."

The wetsal, whose white winter coat forms the ermine of commerce, is found in various forms from the Arctic to the Tropics.

## Indians Show Interest In Red Cross

Blood Indians Of Alberta Impressed By Exhibit Shown At Lethbridge Fair

At the annual fair in Lethbridge, Alberta, where the Provincial Red Cross had an extensive health exhibit, large numbers of Indians from the various tribes of the West and the visitors at the booth, showed great interest in the story of Red Cross and the work it does.

The old chiefs were especially impressed by the fact that some of their own tribes had sent children to be cared for in the Calgary and Edmonton Hospitals. The men of the little tribes were impressed by the strength and a look of profound wonder as they saw the pictures of lame feet straightened, and twisted limbs restored.

Little Susan Medicine Pipe was a recent patient, while the son of two Sioux Indians is waiting for a vacancy in the wards.

A tall, princely looking young Indian, who had come to offer his services to the Red Cross in a annual campaign for funds, and his mother came forward with a promise to send some hand-made beaded moccasins as her contribution to the little sick children in hospital.

## Uses Novel Rest Cure

Novel Author Finds Handkerchief Over Eyes Keeps Nerves Quiet

Sir Gilbert Leitham, the novelist, who recently returned from Paris, where he had to do duty for his novel on David, is lying about in his flat, a long blue and white striped handkerchief on the arm of a chair, folded in the shape one sees a man's coat. And the author adds, for Sir Gilbert says, "I went to Sir Henry Irving's dressing-room one evening. He was lying down with a big silk handkerchief, such as this one, over his eyes, and he said, 'Toddy, I can't sleep because my nerves sleep every evening; it rests me!'"

"I bought two handkerchiefs," added Sir Gilbert, "and tried the same effect. I am a very bad sailor, but when I travel now it is one of these handkerchiefs that I always wear. In fact, for the first two days, and I haven't been seasick for the last 2 years. Now, when I am sailing, I always wear my eyes over my eyes. The handkerchief keeps the nerves of my eyes quiet, and so I can dictate for one or two hours without fatigue."

**Reliable Weather Forecasts Predicted**

Accurate in About 200 Years Says Boston Meteorologist

Weather forecasts may be expected to be accurate in about 200 years, according to George A. Loveland, Meteorologist of the United States Weather Bureau at Boston. Mr. Loveland declares that with the passing of two more centuries sufficient data will have been collected to make reliable forecasts possible.

Forecasts at present are about 50 per cent accurate, he declares. The weather is controlled directly by the sun, he says, but while astronomy is an exact science which has been studied for centuries, meteorology has been studied for only three quarters of a century.

When the effect of the sun's heat on the earth has been studied for two centuries more, Mr. Loveland hopes the meteorologist can accurately predict the weather far in advance.

Not Allseigner Correct

Interviewer: "I have been informed, sir, that you began life as a poor bricklayer."

Great Contrautor: "There are two mistakes in that sentence. I began life as an infant, and there is no such thing as a poor bricklayer."

Husband: "If you hadn't taken so long to get ready we shouldn't have had to wait so long."

Wife: "Yes, and if you hadn't hurried me so we shouldn't have had so long to wait for the next one."

The Guest: "I say, walter, I believe it's bad form to speak disrespectfully of one's elders."

The Waiter: "So I 'ave 'eard, sir."

The Guest: "Then I will be silent about this chicken."

The custom of referring to important people as "nobs" had its origin in the "nobs," abbreviated Latin for "son of a nobleman."

The wetsal, whose white winter coat forms the ermine of commerce, is found in various forms from the Arctic to the Tropics.

## World Collect Relics Of Gold Rush Days

Few Reminders Of Past On Old Cariboo Road

British and Americans at Kamloops, B.C., are pressing for popularity some of the few remaining relics that marked the picturesque gold rush of the old Cariboo Road.

The road is now a motor highway becoming increasingly popular with tourists, but only a few years ago it was traversed by covered wagons, teams and pack trains, while during the height of the Cariboo gold rush camels were brought into use as beasts of burden.

The Cariboo Gold Rush was opened up by the Pacific Great Eastern Railway and the automobile, practically all the freight was carried in huge wagons hauled by teams or more often camels, but today the highway has been completely paved and there are few reminders of the past, except the old log-built roadhouses that years ago were the sole outposts of civilization in wide stretches of country.

Issac Lehman, of Ashcroft, passes one of the huge freight wagons which hitched with a couple of others behind a team or twenty oxen, came into use sixteen years ago, and Angus with American entries providing an international aspect, was especially keen. Dairy herds from five provinces were strongly in evidence, a number of them fair, and here again competition was of the best. At all points local entries in the more important classes of livestock were fewer than might be deemed to be the case, but were less impressive, and the entries in the other classes, especially the Oregons, entries declared the Oregon Fair to be outstanding in regard to its stock entries.

Along the roadside between Quesnel and Kamloops, the old gold country at northern Cariboo is the scene of the famous B.X. Express Company's wagons, hung on leather before the days of steel springs. It is rapidly falling into decay. In Quesnel is the famous old camp of the Cariboo Gold Rush, with millions of dollars to the goldfields. No effort is being made to preserve it.

Representations may be made to the provincial government to have these relics collected and restored so that they may serve as a reminder of the initiative and enterprise which they displayed.

## Class "A" Fairs

Western Canada's Fine Big Fairs Were Most Successful This Year

On the whole the five big western fairs this year were an unequalled success. The first of these to open was the International Press Exhibition at Coquihalla, in the *Quesnel* newspaper in Coquihalla, on Aug. 1. The East Broadway, a collector of rare manuscripts, has produced a copy of the English *Mercator*, printed in 1585 which he claims is the oldest original printed in the world to be found.

The English *Armenian*, which was printed in Whitchurch, Eng., on July 23, 1538, carries an account of the sighting of the Spanish Armada off the coast of England.

There are a number of fine pieces in rare, contains four pages and is printed on hand-made paper.

The *English* *Chronicle*, which was printed during the reign of Queen Elizabeth by Christopher Marlowe, has

Bestand also a copy of the *Worlde Chronicle* for 1606 for Jeffrey Chorlton, to have been sold at Chorlton's shop at the great door of St. Paul's Church in London.

The *Chronicle* is printed during the week of Monday, January 31, of that year, and contains an account of the execution of Guy Fawkes and seven other persons who endeavored to bomb the House of Parliament during the reign of King James I.

The amount to be had: "Gunpowder, Treson, and Plot." The foregoing papers were purchased thirty years ago by Bestand in England at which time he also secured an English prayer book which was printed in 1606.

Bestand also has a copy of *The News*, printed in London in 1665, containing an article describing the great smallpox plague that occurred in the city during that year. It was published by Thomas Newcom, of London.

A copy of *The London Gazette*, published Monday, September 10, 1665, giving an account of the fire which took place in the city, is also owned by Bestand, who claims that these publications are original and the first one mentioned is, so far as he has been able to learn, the oldest in existence.

## Newspapers of Early Period

English Mercury, Published In 1558, Tells About the Spanish Armada

In answer to the claim made recently in Germany in the effect that the copy of the *Augsburg Arvin*, dated 1606, now on exhibition at the International Press Exhibition at Coquihalla, is the *Quesnel* newspaper in Coquihalla, on Aug. 1, Bestand, a collector of rare manuscripts, who came out to take part in the grain harvest, many of whom it is expected will remain in the country for the purpose of taking up residence. Some 41,301 settlers from overseas passed through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railways. This number includes 4,000 German workers who came out to take part in the grain harvest, many of whom it is expected will remain in the country for the purpose of taking up residence. Some 41,301 settlers from overseas passed through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railways. This number includes 4,000 German workers who came out to take part in the grain harvest, many of whom it is expected will remain in the country for the purpose of taking up residence.

The English *Armenian*, which was

## The Influx From Overseas

Steady Stream Of Settlers Coming Into Western Canada

Settlers have been coming into Western Canada in a steady stream during the past year, and nearly all have gone direct to the farming districts to take up land or to take employment with farmers.

Many came to join relatives or friends, but others, since Jan.

1914, have come from overseas through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railways. This number includes 4,000 German workers who came out to take part in the grain harvest, many of whom it is expected will remain in the country for the purpose of taking up residence.

**Russians Are Clever Students**

New Canadians, Make Most Creditable Showings At School Here

The Edmonton Journal says editorially: "A Russian lad who started at school in Calgary, Alberta, two years ago is a wonder. English classes are average in 90% of Grade 9 examinations. On one subject he made 100, and even on English literature, in which a foreign-born student is naturally at a disadvantage, he made 84."

Bestand also has a copy of *The News*, printed in London in 1665, containing an article describing the great smallpox plague that occurred in the city during that year. It was published by Thomas Newcom, of London.

A copy of *The London Gazette*, published Monday, September 10, 1665, giving an account of the fire which took place in the city, is also owned by Bestand, who claims that these publications are original and the first one mentioned is, so far as he has been able to learn, the oldest in existence.

## Stuart River District

Western Canadian Business Man Establishes Model Farm In I.C.L.

J. G. Whiteacre, a well known western Canadian, has established a model farm at the Stuart River District, Central British Columbia, advises that growing conditions have been favorable along the Stuart River, and that the new farm is in full production.

Mr. Whiteacre is performing a great service for the Stuart River section in the efforts he is making to place agriculture upon a profitable basis, the *Mountain* being the only newspaper in the region which has given the new farmer a chance to let his troubles be known.

Mr. Whiteacre is performing a great service for the Stuart River section in the efforts he is making to place agriculture upon a profitable basis, the *Mountain* being the only newspaper in the region which has given the new farmer a chance to let his troubles be known.

On the origin of this interesting country, back to ancient times, when the man of the Lord of Howth was kidnapped by gypsies, and only given back on condition that the hospitality of the castle should never be refused to any one.

Where Canada Leads

Statistics show that Canada now leads the world in the production of nickel, asbestos, hydro-electric power and newspaper. The Dominion has the second greatest number of telephone lines, the second greatest number of automobiles, and is third in the production of silver, gold and aluminum.

A visitor to a harvest festival service at a country church was admiring the beautiful flowers on the altar and elsewhere.

"Yes," said the old reverend, "they are very nice, I'll admit. They are given away to those who are sick after the sermons."

Venus is almost exactly the same size as the earth.

## Oldest Tennis Court Found

Built In England Four Centuries Ago

By Henry Eighty

Four hundred years ago King Henry VIII had a tennis court built in this country in the *Windsor* temple court.

The "bluff" monarch had taken over the great Palace at Hampton Court, which Cardinal Wolsey had built for himself out of his ample revenues; but it had been sold to King Henry VIII, and the tennis court was one of his.

King Henry VIII was a player here, and Elizabethan an onlooker, if not more.

The most famous onlookers was probably William Shakespeare, for he was a tennis player, and he died before the court in a round of festivities, which included play of every kind.

Greatest of all the games played on this historic court was that one in May, 1536, when our royal ancestor, George, King of England, and his Queen, Anne Boleyn, were married.

These rich people make us sick. What's the use of having money if you don't know how to enjoy it?"

"Well, what's the use of knowing how to enjoy it if you haven't got it?"

Employment Bureau Manager: "So you'd like to employ a man. What kind do you want?"

Employer (a Scot): "I'd like to have one of those free masons I've heard so much about."

A German engineer is building an automobile 125 feet long, with fuel capacity for a month's travel, to use in the Sahara desert.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, photographed at the C.P.R. Station North Toronto, recently together with the party of business men and women of the company who are accompanying him on his extended inspection of railroads and other activities throughout the Dominion. From left are Mr. MacTavish, vice-president east coast line; Dr. W. W. Chisholm, Hon. Senator Simeon White, Ross H. McMaster, C.P.R. director, and president of the Steel Co. of Canada, Sir Charles Gordon, director of the C.P.R. and president of the Royal Bank of Canada, F. W. Molson, C.P.R. director and Beaudry Leman, general manager of Banque Canadienne Nationale.

"Suddenly a man rushed out and said to me, 'Hands up, or I will blow your brains out!'"

"And did he?" Justice Eisner Zeitung, Cologne.

### Christianity's Next Task

The signing of (1), the Treaty of Versailles in which is incorporated the covenant of the League of Nations; (2), the naval treaties at Washington; and (3), the Kellogg anti-war declaration recently at Paris, were all hailed by press, public and public important milestones along the road to permanent world peace and a better understanding among the races of earth. Special efforts were made in connection with these events, but not all of these events, while thousands of messages of editorial matter were printed lauding these notable efforts to put an end to racial animosities. And every word written or spoken in praise and support of these great peace movements was fully deserved.

But, noted the Library Digest, the new program for world-wide spiritual regeneration adopted by the International Missionary Council at its last meeting in Jerusalem may be considered as revolutionary in the ecclesiastical world as the above named three events are in the political world. All look to the promotion of peace, but the Jerusalem Conference, perhaps, probed deeper into the problems which agitate the world and array nation against nation, race against race, and, according to the Library Digest, while little publicized, held its own the regeneration and reconstruction of the Conference held on the Mount of Olives, no better ring or parous of peace offered ever, yet much was done that posterity may rank Jerusalem with Geneva, Washington and Paris in the onward march of mankind toward International unity and the ending of racial hatred.

During the last decade, the most momentous outside the Holy City was the race problem, the rights of minorities, the protection of women and children in industry, relations between strong and weak nations, the land question, intellectual and spiritual co-operation, relations between church and state, and various other phases of world peace. Specialists on race, industry, and international relations from the minorities section of the League of Nations, the Universities of London, Harvard and Columbia, among other institutions, were present to contribute to knowledge as these problems were attacked.

And with what result? Following long and searching study of conditions as they now exist in countries all over the world, and the relation and duty of the Christian church to the International Missionary Council, came more and more the demand that "The Church is not neutral and cannot set its face against race hatred, race envy, race contempt, or against racial, national and social pride, or against the lust for wealth and exploitation of the poor or weak."

It was evident right at the beginning of the Conference that the old attitude of "saying to the West over the East, regardless of Nordic civilization, and the Christian religion as one and the same, was not acceptable." The idea of race superiority was not admitted for a moment, and the Conference indicated its belief that the basis of race prejudice is economic. In lands where races live side by side, participation by all in racial, social, economic and spiritual life is the only intelligent solution, was declared to be the natural expression of Christianity, and was welcomed as a step toward world-wide understanding.

Who is there will deny that such beliefs and conclusions are in line with the teachings and spirit of the Founder of Christianity?

And does not the entire trend of the world's spiritual message for the peace of Canada, especially for the people of Western Canada? Or have we not been unfortunate revivals of ancient campaigns by certain classes of our people against other classes based solely on questions of race and creed. Most unfortunate of all is the fact that many of the leaders in these campaigns, which are a denial of Christ's whole life and teaching, are recognized leaders.

It is the high hope and deepest ambition of many thousands of forward-looking patriotic Canadians that this young Dominion reaching out in its new nationalism will become a power for good in the world; that its greatness will be found not alone in its wealth of natural resources, its far-reaching trade and commerce, its cultural attainments, but in those spiritual attainments and contributions to all mankind which, in the final analysis, are the true measures by which to estimate the greatness of any people or nation.

### Good Job For Him

He was the shovelt boy on earth, and finally he was appointed to a minister. He was so slow it took him a year to feel like a minister, so he had to sit plumb through four buttresses, and after taking all afternoon to change the goldfishes' water, he asked what else he could do.

"Well," said his master, "you might take the tortoise for a run."

### Forced Fire Costs

Canada's bill for forest fire losses amounts to more than \$150 a week for every man, woman, and child of the population. Firemen and fire-fighters everywhere are putting forth efforts to reduce and eventually wipe out this heavy loss.

The longest railway run is from Riga to Vladivostok, 6,900 miles.

### Prosperity In Central B.C.

D. D. Munro, provincial government land settlement agent, Smithers, reports that crop prospects for Central B.C. are excellent. The weather has been good. He states that since the erection and operation of the grain elevator at Prince Rupert, a number of farmers are going in for grain-growing with splendid results. He also states that the new grain elevator is having a very beneficial effect, and he is enthusiastic with respect to the future prospects of that territory.

During a spell of cool weather the Achenbachs were to be seen going about with their months open. There was a nip in the air.

The first geological period, called the azole, contained no trace of life in any form.

### Tourist Trade Increasing

Figures for 1926 Will No Doubt Show Gain Over Last Year

While it was estimated that American tourists spent \$200,000,000 in Canada last year, there is no doubt but that figures for 1926 will show fresh gains, stated R. R. Odell, assistant intelligence service of the department of interior, who was in Edmonton in connection with affairs of his department.

Development of the tourist trade is of extreme importance to Canada and its value is fully recognized, said Mr. Odell. In carrying on its work, the federal branch is co-operating with the provincial governments and other local bodies.

### ARE YOU RUN-DOWN?

All That Is Needed Is A Tonic To Build Up The Blood.

There are many people who have been semi-invalids so long that they accept their condition as a life-burden. They have given up exercise, ironed sleep and a generally run-down feeling so long that they have lost all interest in life.

In most of these cases a well-chosen diet, fresh air and a tonic to the blood will bring them back to health.

And as a blood-building tonic no other medicine can compare with Dr. William's Milk of Magnesia.

## Criticizes Move To Bring Jobless From Britain

Toronto.—Immigration problems formed the chief subject of discussion at the recent Trans-Canada Labour Congress of Canada. While there were few aspects of the immigration policy left untouched, the highlights of the session were the unequalled qualifications of the British job-hunters, mentioned in an address by Hon. Peter Horan, in which the Minister of Labour dealt forcefully with the immigration question.

Mr. Horan charged that there was a well-thought out campaign being conducted in Great Britain to stampede the Dominion government into bringing British unemployed to Canada by the shipload. The problem was compounded by the desire of certain interests in the old country to solve a political problem and encouraged by persons in Canada who wanted to flood the local market and provide work for all even at the expense of the home market.

As an instance of the working of the scheme, the speaker said that advertisements in England were telling the people that coal miners were wanted in Canada at high wages when in fact there was a surplus of miners in every coal field in the Dominion.

"It's a lie," declared Mr. Horan, "to say that the British unemployed are not wanted and that they are content to subside on the dole. They want to work and so the false reports of lots of work and high wages in Canada are easily received."

"Canada ought to have something to say about this," he continued, "Canada ought to be past the stage where we can take up a paper and read calmly that a British magnate has offered to bring certain classes of a crime to go on suspended sentence if he migrates to Canada."

The Labour minister defended the movement of British miners to Canada as a natural development and pointed out that it was separate from immigration policy generally.

"We knew we could get men in other parts of the world," he said, "but the British government has got 250,000 men accustomed to have manual work, and why should we turn down our own flesh and blood?"

## Gamboling In Land Values

Says Prices All Over Canada Are High, That Is Inflated

London, Ont.—Gamboling in land by all classes of Canadian citizens is one of the major reasons values are at such prices, declared A. G. Datzell, a Toronto speaker at a meeting of the Toronto Real Estate Institute of Canada, the convention now being held in the city.

The speaker quoted prices to show that land values were very much higher all over Canada than in England or the United States, and that a wholesale speculation for this was a wholesale speculation in properties all over the Dominion.

### Most Care Precious

Opposition—Due to the frequency of accidents this year, all Danish military and naval aviators will be equipped with Irving parachutes from Oct. 1. Military orders decree that no aviators should fly without a parachute attachment.

**Infantile Paralysis In Montreal**  
Montreal.—Four cases of infantile paralysis were reported at the city hall in the past week and Dr. Bouchard, medical officer, has issued a warning to take precautions against an epidemic.

### Queen Mother, Queen

Domestic—A confirmed report was received here that Queen Marie of Romania, widow of the late King Ferdinand and grandmother of King Michael, may become engaged to a wealthy American.

### Entertained Prince George

Hollywood, Cal.—Prince George, who is a lieutenant of H.M.S. Durban now anchored at Santa Barbara, slipped into Hollywood on automobile and was the guest of Douglas Fairbanks and Mary Pickford.

**New British High Commissioner**  
London, Eng.—Sir William Clark, the new British high commissioner to Canada, accompanied by Lady Clark and their two daughters, are sailing for Canada on the Empress of Scotland.

Africa is inhabited with 140,000,000 black and 4,000,000 white people.

## Old Age Pensions Paid

Amount In B.C. Totaling \$441,322 To June Last

Ottawa, Ont.—Old age pensions totaling \$441,322 had been paid up to June last, to 3,159 persons in British Columbia, who are citizens of the schools, according to statistics just compiled by the department of labor. Of this amount the federal government paid one-half.

British Columbia's pensioners consist of 10 per cent of the population of that province over 70 years of age. The average monthly pension was \$17.47, the pensioners being divided into 1,871 males and 1,279 females.

The majority owned by these pensioners, is valued at \$142,782. Of the pensioners in British Columbia, 271 were previous residents of Ontario, 207 of Alberta, 102 of Quebec, 175 of Saskatchewan, 75 of Nova Scotia, 37 of Quebec, 37 of the Yukon, and 10 of Prince Edward Island. When any of those provinces come into the scheme a proportion paid to the pensioners is paid to the provinces charged to the respective provinces. Saskatchewan has been paying pensions since June and expects to have 1,000 on its payroll in September.

Manitoba and the Yukon will be paying pensions soon.

## Opportunities In Peace River

**Lord Lovat Finds That British Settlers Are Doing Well In North Country**

Edmonton, Alta.—"There are wonderful opportunities for British settlers in the Peace River country," declared Lord Lovat, chairman of the British Overseas Settlement committee, on his return to Edmonton following a week's tour in Canada's far-northern country.

"We met the settlers of the British families who were settled at various points throughout the Peace district under the 3,000 family scheme, and without exception, all these people are doing well and are more than satisfied with their venture."

Many of these were miners and few of them had any previous farming experience, but they are making good, and their experience shows clearly that given the will to succeed, lack of experience is no bar to success."

Lord Lovat found that over 5,000 British families and settlers have gone to the Peace River country and everywhere there prevails a spirit of optimism for the future.

## Submarine Rescue Device

U.S. Navy Sets New Apparatus For Saving Sunken Crews

Aboard Submarine Service Patrol Off Submarine Island, Md.—Success off submarine island with the "lung," the navy's new breathing device, intended to enable men trapped in sunken submarines to reach the surface safely, have been made and it is now in use as encouraging, a naval sub will be equipped with them.

Three naval divers descended in a diving bell to a depth of 155 feet, a mile off the island, and were able to open deep two seats with the "lung," the navy's new breathing device, intended to enable men trapped in sunken submarines to reach the surface safely, have been made and it is now in use as encouraging, a naval sub will be equipped with them.

He had talked with the physician who had examined 200 of the men sent on the sub, and only one had any physical trouble, and he was subject to epileptic fits. The others could have worked if they had not lacked the will.

"There is plenty of work," said Mr. Lovat, "and I am sure that men who have wanted at Ringer's mining."

He had himself come back all the way from Ottawa to see that all the

British harvester on his own farm had a good start. He thought the men who can't work in the British harvest because of insecticides were a little shabby."

At the same time he agreed that men new to the work were bound to be inferior to experienced hands.

The speaker warmly praised the work of Mr. Geiley in handling affairs at the immigration sheds under most trying circumstances. "No one could have done it better," he said.

He also spoke of the British harvester because of insecticides were a little shabby."

In his speech he asserted that there were no secret clauses in the agreement.

### Natives Should Avoid War

Geneva.—The much-discussed Franco-British naval accord is to be made public by France through the League of Nations committee of armament.

Foreign Minister Briand of France announced this decision after a speech before the League Assembly in defense of the agreement. He said that the secret clauses had been buried merely in passing, as an example of efforts being made to keep disengagement.

In his speech he asserted that there were no secret clauses in the agreement.

### Ex-Empress Dagmar Ill

Copenhagen, Denmark.—The ex-Empress Dagmar, the 81-year-old widow of Alexander III, of Russia, and sister of Alexandra, the late Queen Mother of England, is seriously ill here.

## New Plane Tested

Demonstration At Los Angeles Proves Automatic Landing Feasible

Los Angeles, Calif.—A plane constructed on a new vertical principle, made successful test flights here, demonstrating, observers said, that an aircraft can make an automatic landing.

Merle F. Kelley, who piloted the plane, was said to have taken the craft from ground on 8½ seconds, soared sharply upward, cruised at 100 miles an hour and then landed with both hands.

The new principle was described by A. A. Merrill, inventor, as fitting the wings, which are a single unit, to the speed device in the cockpit. The plane has a short fuselage and very little body. In its construction the inventor was assisted by Dr. R. A. Kline, Dr. Harry Bateman and Dr. A. L. Klein, of the California Institute of Technology.

## U.S. Building De Luxe Planes

Passenger Will Be Assured Of Every Convenience For Comfort

Los Angeles, Calif.—Four passenger planes of 20 passengers each, equipped with luxuriously appointed apartments and sleeping berths, are being built by the Keystone Aircraft Corporation at Bristol, Penn. Dr. Joseph C. Stoddard, president of the firm, has an interest in the project.

The new monoplanes, the largest ever built in America, are of all metal and designed to fit into a 100-foot span. They can be started at 155 miles per hour. Provision has been made for landing water and a radio will be installed.

## MOST OF BRITISH HARVESTERS ARE MAKING GOOD

Winnipeg.—"We are just finishing out the slackers, that's all, and I am quite confident that the majority of the men are making good," declared R. E. Forde, Minister of Immigration, at a conference regarding British harvesters, which he had with Thomas Geiley.

About six hundred have been sent back to England, and 1,000 more will be sent to Canada, having failed to make good; but that left something like eight thousand British harvesters in the Canadian fields, who were being brought forward, because they were not being worked.

He had talked with the physician who had examined 200 of the men sent on the sub, and only one had any physical trouble, and he was subject to epileptic fits. The others could have worked if they had not lacked the will.

"There is plenty of work," said Mr. Lovat, "and I am sure that men who have wanted at Ringer's mining."

He had himself come back all the way from Ottawa to see that all the

British harvester on his own farm had a good start. He thought the men who can't work in the British harvest because of insecticides were a little shabby."

At the same time he agreed that men new to the work were bound to be inferior to experienced hands.

The speaker warmly praised the work of Mr. Geiley in handling affairs at the immigration sheds under most trying circumstances. "No one could have done it better," he said.

He also spoke of the British harvester because of insecticides were a little shabby."

In his speech he asserted that there were no secret clauses in the agreement.

Geneva.—The much-discussed

French-British naval accord is to be made public by France through the League of Nations committee of armament.

Foreign Minister Briand of France announced this decision after a speech before the League Assembly in defense of the agreement. He said that the secret clauses had been buried merely in passing, as an example of efforts being made to keep disengagement.

In his speech he asserted that there were no secret clauses in the agreement.

**The Curling Rink**

Owing to the efforts of the  
conversers, the rink committee,  
find themselves fully able to  
commence on the large structure,  
which at first seemed an impos-  
sibility when the winter was so  
close at hand. The levelling is  
now going on with full force  
under the supervision of Mr. R.  
Hopkins, J. Cairns being on the job  
also with his Harts-Parr and the  
grader. The committee met  
last night, Wednesday, of which  
the results will be published next  
week. The rink committee are  
as follows: N. J. D'vereaux, Sec-  
retary; Dr. McLeman, President;  
J. T. Kerr, Vice-Pres.; A. C.  
deNair, Treasurer, etc. Committee  
Building Committee: Messrs.  
Simpson, N. Spence, McDonald,  
Arrier. Finance Committee:  
Messrs Kerr, A. C. McFair and  
Lacklin.

Some 136 shares have been  
sold, at a price of 8.00 each they  
will yield 10.00 and the sound-  
ness of the proposition need not be  
expounded. The willingness of  
our local residents in helping to  
make this project the success  
that it has been, is very much  
appreciated, and the committee  
hope that a few more shares will  
be purchased to lighten the  
burden.

UX-201-B Radiotron uses only half as

much filament current as the former

standard UX-201-A, thereby reducing  
the cost and frequency of "A" battery  
recharging.

Distant stations brought in with ease

and clarity.

New improved cone speaker, de-  
veloped by Westinghouse, and many  
other features which we will be glad  
to show.

Single dial control.
